(a) F10: Host omission at handoff
Discovered + resolved hosts (in this run)
H (target host)
H2
H3
…
handoff
H2 , H3
Downstream evidence
H2 , H3 , … only
persist
Persisted resolved-host manifest H, H2 , H3 , …
In this example, the manifest retains H
(b) F4@dns: DNS evidence omission during normalization
Other evidence families
cert. → e_certificate
active → e_active_obs
reg. → e_registration
claim asset identity / org association
decision records Support references changed
report_item records Support references changed
excluded at decision-stage normalization
DNS input (clean-run reference)
e_dns excluded from normalized evidence view
Claim predicate and object unchanged
Asset projection unchanged
