(a) DNS-only candidate-invisibility boundary

DNS-only stratum
43 sampled and technically valid locations
42 consequence-eligible locations

Ground-truth host absent from
the main candidate set $C_i^{main} = E_i \cup R_i$
Target host absent from the main candidate set
42/42 consequence-eligible units

ground-truth host not admitted to ranking

required host cannot enter the alert set

DNS-only descriptive analysis

Detect@1 = 0

(Combined · IF · Robust-(z))

Exploratory common-planner analysis

OPS = 0/42

for all three localizers
under both planning policies

(b) Detect@1 by new-location stratum
